Description

From the Technical description:

We will develop the concept for a database to post open positions in start-ups, enabling team building across Europe, giving start-ups access to talent but also facilitating scale-up in Europe through understanding of European markets. The technical implementation of the database will be realized in WP One Campus.

Report

Within the WP5 group representatives from RWTH Aachen have taken on the responsibility of moving this deliverable forward. A first prototype is designed from current solutions, in place and being tested within the RWTH Aachen ecosystem. Matchings Archive - collaeb.io

Project plan: IT DB for start-up positions

Concept (months 1-12)

Implementation (months 12-16)

Representatives from Chalmers and RTWH Aachen have also had meetings with WP2 to plan the implementation of the database into the WP One Campus platform as we move forward. There is still some work to be done within the column B as shown above and this will be developed in parallel with the integration.
